

# Respiratory Humidifier i7

Provide effective respiratory treatment with high flow and precise humification with warm Air-O<sub>2</sub> mistreatments

## High Oxygen Flow Mode

## Wide Dew-Point Temperature Regulation

## Multi-Parameter Monitoring

- High Oxygen Flow Range with Sensor (As high as 80L/min)
- Wide Dew-Point Temperature Setting from 29°C to 37°C
- Unique Intelligent Voice Prompt
- SpO<sub>2</sub> Module (Optional)
- Nurse Call Option
- PM2.5 Filter

# Respiratory Humidifier i7

Designed For Effectiveness

## Flexibility For Different Patients

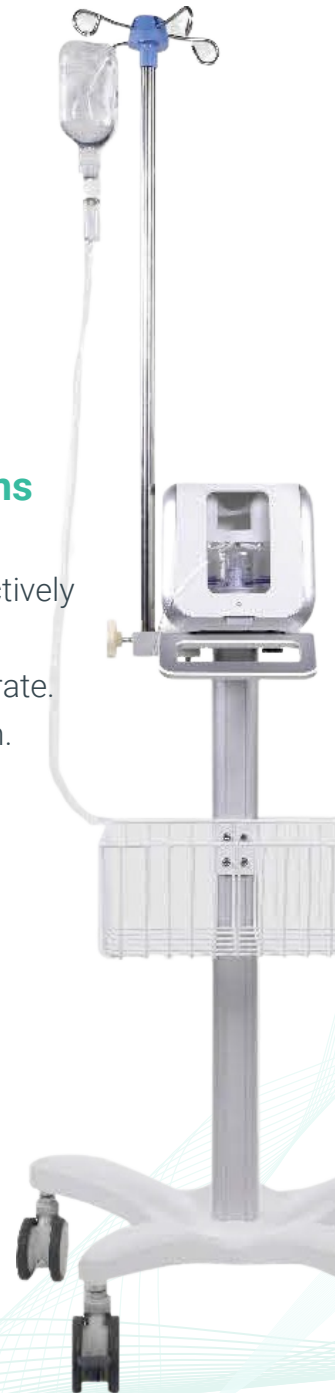

- Ensures treatment efficacy with a flowrate output as high as 80L/min, which effectively washes the dead space of the nasopharynx to avoid the patient inhaling the unhumidified air.
- Patient with different heat intolerance are covered by a wide range of temperature settings from 29°C to 37°C.

## Commonly Used In Hospital, Health Centers and Sanatoriums

- Centralized alarm management for professional staffs.
- Non consumable oxygen sensor avoids repeated replacement, thus effectively reduces the cost of use.
- Accurate and real time monitoring of blood oxygen saturation and pulse rate.
- Effectively prevent dust pollution and respiratory and pulmonary infection.

## Suitable For Home Use

Configurable voice alarm/operation prompt for home used patients.

# Respiratory Humidifier i7

Designed For Effectiveness

## Technical Specifications

Treatment Mode	High Flow Mode, Low Flow Mode
FiO2	21%-100% (Automatic)
Dew-point Temperature Range	29°C - 37°C Continuously Adjustable
Flow Range	Flowrate 2-80L/min
Monitored Parameters	Temperature, Flowrate, Oxygen Concentration, Respiratory Frequency <i>Optional: SpO2, Pulse Rate</i>
Trend Graph	1, 3, 7 Days Trend Review
Voice Alarm	Standard
Oxygen Sensor	Non Consumable Material
Nurse Call	Standard
